

Accuracy of 144 eigenvalues computed with error tolerances ranging from  $2e-1$  to  $1e-4$ .  
Convergence governed by the smallest 72 eigenvalues. Problem size: 67600, shift:  $1e-3$ , regularization: 0, overlap: 3

Method: GeneralizedInverse

Error in eigenvalues w.r.t. Arpack's solution with error tolerance of  $1e-14$

Method: GeneralizedSymmetricStewart
